DETAILED CASE STUDIES

DETAILED CASE STUDIES

03

CASE STUDY #1: Real Estate Customer

Challenges & Issues

- Company data was sorted in silos or stored in Excel files and multi legacy systems, which made it difficult to share it across departments
- Low scalability of the existing platform
- No ability to tailor the system the way the company needed and let teams use it in different ways.

IIST Solutions

The following scope has been done

- Implementation and Support Operation of Salesforce Projects
- Analytics customer subsidiary's pain points
- Create proposals, and design a system landscape: How can leverage Salesforce products benefits when working with customer's existed system
- Implementation of business processes on Salesforce platform
- User training
- System operation and support
- Migrate and Transform Data
- Consult and make system improvements

Technology

- Sales & Service Cloud, Commerce Cloud, Marketing Cloud, Pardot, Experience Cloud

Development Methodology

- Salesforce Adaptive Methodology

Overview

IMPLEMENTATION AND SUPPORT OPERATION OF SALESFORCE CRM SYSTEM

Sales & Service Core CRM

Commerce Cloud

Marketing Cloud + Pardot

Experience Cloud

SYSTEM INTEGRATION

Call Center

DataLake

Loyalty System

Industry System (Automotive, Health Care, Hospitality, Education)

External App, Web, Social Network, GA360 ...

Results

- The service runs smoothly thanks to IIST's powerful technical support team

CASE STUDY #2: Banking

Challenges & Issues

Need solution for:

- Access all customer information from different channels at a glance in one single source of truth
- Tied up with a user-facing app for credit card payments, letting service reps identify issues customers face on the spot to provide better service.
- Easily navigate between the back-office system for credit checks and communication with users in one centralized app

IIST Solutions

The following scope has been done

- To help customer meet their goals: Transforming the financial industry, raising the value of life; motivating each person to unlock their potential and act bravely for outstanding things. We and Salesforce propose Financial Service Cloud to customer.
 - Setting the Foundation for customer by Salesforce Platform
 - Enhanced Service Center
 - CRM Transformation
- Support for operation and technical maintenance

Technology

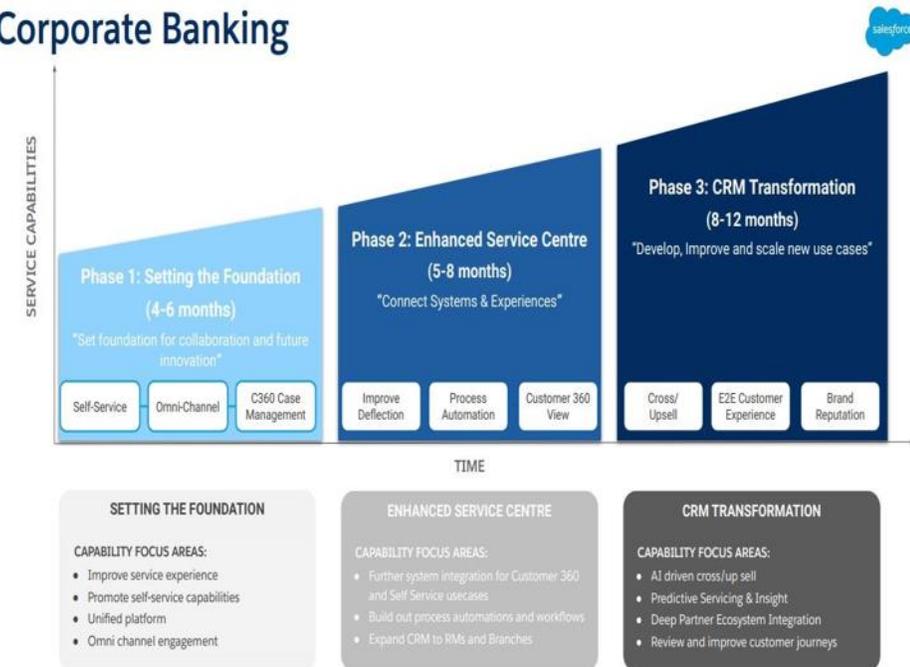

- Financial Service, CRM Analytics, Lightning Component, Visualforce page, Process builder, Trigger & Class.

Development Methodology

- Scrum

Overview

Our Vision To Transform Corporate Banking

Results

- The service runs smoothly thanks to IIST's powerful technical support team

CASE STUDY #3: Securities Customer

Challenges & Issues

- Company is an investment banking firm focused on the wholesale distribution of real estate based investment offerings to Broker-Dealers and Registered Investment Advisors
- They chose to build their business on the Salesforce platform as part of their commitment to delivering trust, transparency and a seamless experience to their stakeholders, partners and clients

IIST Solutions

We offered the Sales Cloud system deployed for customer that is customized according to the business needs of customer including the following functions:

- System administration and users
- Manage customers & contacts
- Sales opportunity management
- Product Management
- Contract Management
- Activity Management
- Manage transaction account information (Customer Account)
- Manage transaction information of the account (Transaction)

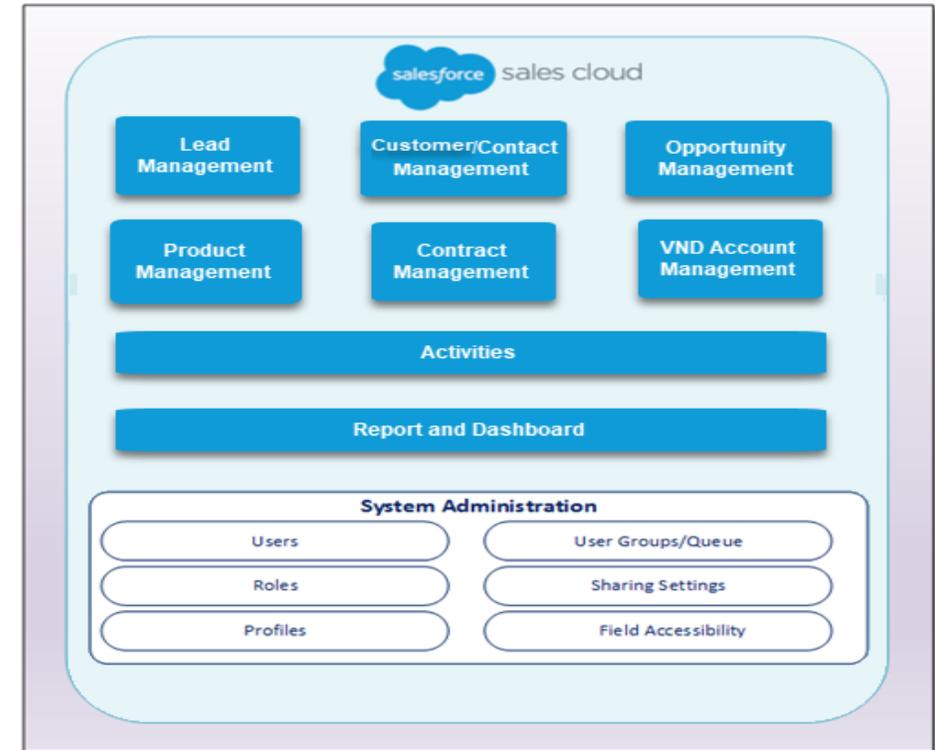

Technology

- Apex, Lightning Component, Visualforce page, Community Builder, Process builder, Trigger & Class.

Development Methodology

- Scrum
